

I Claim:

1. Nasal drip control devices which when placed on the pressure points of the nose, control or cause the cessation of the nasal production of mucus, comprising a plastic coated wire or an adhesive coated plastic strip.
2. The nasal drip control device of claim 1, which has plastic balls on the ends.
3. The nasal devices of claim 1 are a half-inch to an inch in length.
4. Nasal drip control device holder as shown in Figure IV to be held in the hand.
5. A sneeze stopper device that fits over the nose and has curved ends which fit on the nasal pressure points.
